MS Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Attached hereto is an Office Action issued for U.S. Application No. 10/669,350 dated March 16, 2007. A provisional obviousness-type double patenting rejection was cited in the Office Action, copy attached.

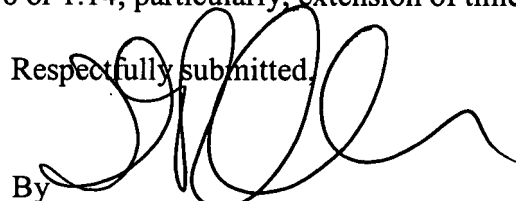

To satisfy the duty of disclosure, Applicants hereto submitting a copy of the Office Action and respectfully request the Examiner to make this document of record in the file of the present application.

Should there be any outstanding matters that need to be resolved in the present application, the Examiner is respectfully requested to contact the undersigned at the telephone number of the undersigned below, to conduct an interview in an effort to expedite prosecution in connection with the present application.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies to charge payment or credit any overpayment to Deposit Account No. 02-2448 for any additional fees required under 37.C.F.R. §§1.16 or 1.14; particularly, extension of time fees.

Dated: May 16, 2007

Respectfully submitted,

A handwritten signature in black ink, appearing to be 'D. Anderson', written over a horizontal line.

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This is response to communication filed 09/14/06.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive.

Response to applicant argue on double patenting rejection, the copending Application No. 10/669270 fail to recite "obtaining a map data set that contains the route from a map database which stores a plurality of map data set, base on the travel route data" and " attaching the photography data to the map data set". Although the conflicting claims are not identical, they are not patentably distinct from each other, the provisional application No. 10/669270 discloses every limitations of application claim invention. Because without the steps "obtaining a map data set that contains the route from a map database which stores a plurality of map data set, base on the travel route data" and " attaching the photography data to the map data set" the application invention unable to obtained travel route data and generating album data including the map data set. Therefore the double patenting stand rejected

In addition, Murashita et al. (US 20020186412) disclose: obtaining a map data set that contains the route from a map database which stores a plurality of map data sets, based on the travel route data (obtained the latitude and longitude as position information according to a map database (0217, Murashita); and

attaching the photography data to the map data set (obtained the data and time of photographing, which is then image data input from CCD 11D, the image data thus labeled with the data and time of photographing is then input from digital camera to image data storage

device, paragraph 0268, Murashita). It is well known to one of the ordinary skill in the art to have incorporated Murashita's map database to have associated with the photography data. The motivation to provide a travel route on the map database and attached the photography data for generating an album

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-16 stand provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-18 of copending Application No. 10/669,270. Although the conflicting claims are not identical,

they are not patentably distinct from each other because claims of copending Application 10/669270 contain every element of claims 1-16 of the instant specification.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
